

Emtriva

Generic Name: emtricitabine

Pronunciation: em-TREE-va

Abbreviation: FTC

Drug Class: [Nucleoside/Nucleotide Reverse Transcriptase Inhibitors \(NRTIs\)](#)

Company: Gilead Sciences

Approval Status: Approved

Generic Version Available: No

Drug Indication

A component of many recommended and alternative treatment regimens for antiretroviral-naive people living with HIV, as indicated by the U.S. Department of Health and Human Services (DHHS) Panel on Antiretroviral Guidelines for Adults and Adolescents. Visit <https://aidsinfo.nih.gov/guidelines/html/1/adult-and-adolescent-arv-guidelines/0> for the full DHHS guidelines.

General Info

Emtriva is an HIV medication. It is in a category of HIV medicines called nucleoside reverse transcriptase inhibitors. Emtriva was approved by the U.S. Food and Drug Administration for use by people living with HIV in 2003. Emtriva, as a component of Truvada, was approved for use as pre-exposure prophylaxis (PrEP) to prevent HIV among those at high risk in July 2012.

Emtriva is available as a single drug or in the fixed-dose combination drugs Atripla, Complera, Genvoya, Stribild and Truvada.

Emtriva must be used in combination with other HIV drugs.

Dosage

Adult Dose: One 200mg capsule once a day.

Pediatric Dose: Age 3 months to 17 years: Dosing based on weight but should not exceed adult daily dose.

Dosing Info: Take with or without food.

Side Effects

The most common side effects caused by drug regimens containing Emtriva are headache, diarrhea, and nausea.

If you have hepatitis B and HIV and plan to stop taking Emtriva, you need close medical follow-up and for several months and your doctor might want to frequently check your liver enzymes after stopping treatment. This is because Emtriva is also active against the hepatitis B virus (HBV). If Emtriva is stopped abruptly, it can cause liver disease to “flare” and damage the liver

Drug Interactions

For a review of drug interactions, including prescription and over-the-counter medications and supplements that should not be taken with Emtriva or may require dose adjustments, consult the Emtriva package insert:
